Subject's extra information

The course as part of the academic plan

The analysis of the financial statements is covered in the third year of the Business Administration and Management Degree. Students are expected to have already acquired knowledge on basic accounting in the first year of the degree and knowledge on financial accounting in the second year so that now in the third year, they are ready to actually produce financial statements that will form part of the annual accounts and be able to interpret them. This subject rounds off all the accounting knowledge needed to actually be able to carry out the tasks involved in business administration and over the year, some of its analytical objectives will also be covered in the Financial Management course.
