Subject contents

These are the thematic blocks which will be covered in this subject:

1. Theoretical concepts and methodological principles in CLIL
2. Materials and resources in CLIL
3. Criteria and tools for assessment in CLIL
4. Planning teaching units in CLIL

Methodology

In this subject both theory and practice are combined so that each of the thematic blocks is organised from this perspective. Therefore, on the one hand, a range of theoretical concepts and methodological principles of CLIL will be presented and explored followed by the analysis of resources, techniques and tools which enhance the development of the communicative competence by means of a cooperative, participative and constructive learning of the foreign language. On the other hand, from a transversal perspective, such theory is explicitly applied to the planning and design and, subsequently, the implementation and evaluation of different teaching sequences in the classroom context.

The subject "Aprenentatge Integrat de Llengües i Continguts a l'Educació Primària", within the English specialty, participates in teaching innovation project from the UdL "La competència reflexiva i l'alfabetització avaluadora en la formació inicial de mestres de la FEPTS: una proposata formativa mitjançant l'ús de Kultura i dinàmiques d'avaluació entre iguals" coordinated by Prof. Alexandra Vraciu. Such participation entails the videorecording of some tasks within the subject (microteaching). The recordings will be employed to facilitate the reflection upon the teaching of the English language and the teaching practice, one's own practice and that of other groups, as well as to work different dynamics to provide *peer feedback*. A

Development plan

The schedule and the way the sessions will be organised will be presented the first week of class.

Evaluation

The assessment criteria are as follows:

- Ability to observe and analyze the teaching / learning process.
- Ability to understand, analyse and apply the theoretical concepts presented.
- Ability to understand, analyse and apply the strategies, techniques and methods presented.

- Ability to establish links between theory and practice.
- Ability to integrate the skills acquired in the teaching practice.

As for the assessment instruments, a **continuous assessment** is proposed in which the student must present a series of evidences that reflect the acquisition of the competences of the subject.

The assessment of the subject consists of the following items:

- I1. Written exam: 25%
- I2. Written programming and oral presentation of a CLIL teaching sequence: 40%
- I3. In-class / online activities and simulations: 35%

I1 will be carried out individually. I2 and I3 will be done in groups / pairs. In order to be assessed, it is compulsory to submit all the items listed above and pass the written exam (5 out of 10). There will not be a resit exam.

N.B.

All the assessment will be in English. Oral and written accuracy is part of the grade and will be assessed according to the B2 level descriptors in the CEFR. More than 10 basic spelling or use of English errors (corresponding to the communicative structures and vocabulary for Primary Education teaching) in one of the assessment items leads to a grade of 0 in this item.

As for the **alternative assessment**, it consists of the following items:

- I1. Written exam: 40%
- I2. Written programming and oral presentation of a CLIL teaching sequence (recorded in video): 60%

Both I1 and I2 will be carried out individually. All these items will be submitted and the written exam will take place the same day for both the continuous and the alternative assessment. In order to be assessed, it is compulsory to submit I2 and pass the written exam (5 out of 10).

N.B.

All the assessment will be in English. Oral and written accuracy is part of the grade and will be assessed according to the B2 level descriptors in the CEFR.
