Clarifications

The evaluation process of the subject is continued and is based on the different activities carried out. To pass this continuous assessment, all activities must be carried out and a minimum grade of 5 points must be obtained (out of a total of 10).

The student who does not take two activities or /and test of the whole syllabus will be listed as not presented .

If a copied assessment activity is detected, it will be valued with a score of zero by each and every student involved.

During the course, and using the virtual campus (sakai platform), the dates on which the different evaluable activities will take place will be confirmed.

Alternative Evaluation

Article 1.5 of the Regulations for the evaluation and qualification of teaching in the degrees and master's degrees at the UdL (approved by the Governing Council on 26 February 2014), to make it easier for students to combine the study with the development of work activities, the student who wants it will have the right to give up the continuous assessment at the beginning of the course. He will have to present an instance to the secretariat in the fixed term and will have to contribute the justifying documentation of labor activity and / or other personal situations, and will have right to the realization of an only evaluation.

The examination syllabus consists of the documents and materials posted on the Sakai platform and that of the indicated compulsory reading books.

The date of this unique test will be the same day of the week 16-17 in which the students of the continuous assessment perform their test of all the syllabus and week 19 recovery, if applicable
