Subject's extra information

The course as part of the academic plan

This subject is given in the third year course for the degree in Business Administration and Management. The subject of strategic management is intended to highlight the fact that in recent decades there is a growing interest in issues relating to the so-called business strategy. This entails a need to study and assess the competitive position of the company as a consequence of the growing and ever-changing complexity of its environment. The business strategy is the response to the company's ongoing need to adapt to the changes in its environment. For this reason, this course is intended to study the company's overall strategic management process, which is comprised of three main parts: strategic analysis, the formulation of the strategy and the implementation of the strategies. It is therefore a subject that is intended to provide the student with answers to the need that companies have to survive or to enhance their effectiveness in an increasingly hostile environment. The solution to this need is that which is intended through the formulation of the so-called business strategy. Throughout this course not only theoretical knowledge is taught but also practical knowledge as business management studies require that the student must have skills and knowledge in order to be able to perform in the realm of the company's Strategic Management. This implies that it is equally important to ensure the assimilation of theoretical knowledge as well as that of its application in resolving business problems and case studies of both national and foreign companies. In this sense, the practical classes are an essential element in the learning of these skills and knowledge as they are the necessary bridge between theory and practice. RELATIONSHIP WITH OTHER SUBJECTS OF THE SYLLABUS. This course builds upon the knowledge gained in the other subjects for the degree, especially the second year subject on Company organisation. In the program of the Company organisation subject (in the second year of this degree) you have a module on Strategic Management and more specifically on strategic analysis. Therefore, in this subject we shall not go in in greater depth at this stage of the overall process of the strategic company management, as you have already covered this in the course on Company organisation. Similarly, the following subjects are also most important for the student: Financial Accounting, Operations Management, Marketing Management, Financial Management and Management Control. PROJECTION TOWARDS PROFESSIONAL FIELDS The subjects studied in this degree are intended to cover the management and administration of organisations and companies.

The professional careers of the students are largely focused on:

- a) The company.
- b) The state or local public administration.
- c) Teaching.
- d) Liberal professions.

Learning objectives

Strategic Management begins by answering these three questions: Where are we today? In order to answer this question we have to do an analysis of the situation: analysis of the environment and internal analysis. Where do we want to go? This implies defining long-term objectives and goals, and the third question we ask ourselves is: how can we get there? This involves understanding the market, understanding the competition and the business, and designing the appropriate strategies.

Based on the program described below, the objectives of this subject are:

1. Learn the basic elements of strategic management, learn to identify and create business objectives, and formulate and implement a company strategy. (CEU1, CEU3, CB1 and CB6).
2. Study the general environment and the specific environment, and know the most appropriate analysis methods for each situation. (CEU3, CB3, CB4, CB6, CES1 and CES4).
3. Analyze the economic structure of the company, know the functional areas and the value chain, and establish its resources and capabilities. (CEU1, CEU3, CB1, CB2, CB4, CB6, CES1, CES4 and CES5).
4. Deepen the sources, application conditions and risks of competitive advantage in costs and product differentiation, as well as identify possible strategies according to the characteristics of the industry. (CEU1, CEU3, CB1, CB2, CB4, CB6, CES4 and CES5).
5. **Determine the importance of business development strategies and analyze the paths of internal and external growth and cooperation strategy. (CEU1, CEU3, CB1, CB2, CB4, CB6, CES4 and CES5).**
6. Define in depth the problems involved in the implementation of strategic decisions and planning and control procedures. (CEU1, CEU3, CB1, CB2, CB4, CB6, CES4 and CES5).

Subject contents

Throughout the program you will see the global process of the company's Strategic Management, which is made up of three main parts: strategic analysis, strategy formulation and strategy implementation. To assimilate the concepts of this subject we will base ourselves on the study and discussion of cases and real situations of Spanish and foreign companies, as well as exercises to solve.

Strategic analysis is the process through which it is possible to determine the set of threats and opportunities that the environment presents to the organization, as well as the set of strengths and weaknesses of the organization, in a way that allows the Management to diagnose and evaluate the situation and the corresponding formulation of a strategy, once the vision, mission and objectives of the company have been defined.

The formulation of strategies tries, from the strategic analysis and according to the proposed methodology, to formulate or design the possible alternatives that are available to achieve the mission and the objectives that have been chosen from the context defined in the external and internal analysis.

Strategic implementation involves the development of a strategic plan that includes the objectives and decisions that have been adopted in previous stages, as well as the allocation of means and the path to follow so that the strategy is successful. The implementation is completed with strategic planning and control.

Methodology

Methodology

There are two ways to follow this subject, through:

1. the continuous evaluation system
2. the single evaluation.

Continuous assessment

A good way to approach the study of this subject for students who follow the system continuous evaluation is the next:

- a. The classes are face-to-face where a lot of emphasis is placed on the exercises and cases to be solved. We will combine explanations about the theoretical aspects of your academic program with the resolution of practical cases and exercises from the business world. There will not be 100% theoretical classes.

On the first day of class, not only will the presentation of the subject take place, but we will also begin the syllabus.

IGUALADA CAMPUS:

Classroom: pending assignment.

Monday from 3 to 5 p.m. CLASS ATTENDANCE. NO ROLL CALL.

Tuesday from 3 to 5 p.m. CLASS ATTENDANCE. NO ROLL CALL.

- a. You must download the notes that are posted in "resources" where not only are the theoretical concepts of each topic but also the exercises and cases that will be explained and resolved in the face-to-face classes.
- b. In order to give more important weight to the practices, there is a folder in resources called "More_Exercises_and_Practical_cases" that includes more cases apart from those already included in the points. The objective is for it to be a very practical subject. For the first fifteen days of the course we will only use the notes since they also contain exercises and cases. Later, I will post more exercises. BRING NOTES TO IN-PERSON CLASSES TO BE ABLE TO SOLVE THE EXERCISES.
- c. **The hours you must dedicate to this subject** They are the same as those on your schedule.
- d. Requesting personalized tutoring to resolve doubts that may arise in the subject is the best tool that the student has to successfully pass this subject.
- e. **Enter the virtual campus** of this subject weekly. In this space you will find: the statements of the exercises, the solutions, warnings, notes, notes for this subject, etc.
- f. Continuous evaluation consists of the student carrying out, **of a minimum of 3 exams out of 4**. If the student does not take an exam and, therefore, does not take it, then he or she will obtain a grade of zero.
- g. If a student takes three exams with their respective weightings and obtains, once the three exams have been completed, a grade of 7, he or she can decide to take or not take the fourth exam. She has no obligation to do so. In her minutes she will have a grade of 7 (notable). If she wanted a better grade she should take the fourth exam. Obviously, the following percentages will be applied to each exam that is presented:

EX1 x 24% + EX2 x 26% + EX3 x 24% + EX4 x 26%

Those students who, after taking 3 exams and applying their weighting, have not yet passed the subject are required to take the fourth exam.

The percentages are not redistributed based on the exams that have been taken, you will lose it directly but take a specific exam.

Each exam has a specific weight:

EXAM 1: 24% (in-person theoretical multiple choice exam).

- **CORRECT QUESTION: 1 POINT.**
- **WRONG QUESTION: -0.25 POINTS.**
- **QUESTION NOT ANSWERED: 0 POINTS.**
- **For each question there is only one correct answer.**

Note: There will be test questions where you will find your answer from studying the notes and others where you will have to reason them (understand and reflect on the notes and then make the decision) before marking the correct answer. There will only be one correct answer.

- No device (mobile phones, digital cameras, video cameras, etc.) may be used during the exam.
- Any copying system or attempted copying will result in failure of this exam.
- You will not be able to consult the notes or the exercises...nothing.
- According to art. 3.1 of the UdL evaluation regulations, the student cannot use, in any case, during the evaluation tests, unauthorized means or fraudulent mechanisms. The student who uses any fraudulent means related to the test and/or carries electronic devices that are not permitted must abandon the exam or test, being subject to the consequences provided for in these regulations or in any other internal regulations of the UdL.

If the student does not show up, he or she will receive a grade of zero. The percentages are not redistributed based on the exams presented, he loses directly.

IGUALADA CAMPUS: December 12th.

Classroom: in his usual classroom.

Bring computers to the classroom.

Date: December 12th.

Total questions: 24

Time: 15 hours.

TIME: 40 MINUTES. You can go forward and backward.

TEST TYPE EXAM.

THEORETICAL EXAM: 24%.

TOPICS: 5, 6, 7 and 8.

The final grade is calculated as follows:

FINAL NOTE OF THE SUBJECT: $EX1 \times 24\% + EX2 \times 26\% + EX3 \times 24\% + EX4 \times 26\%$

There is no recovery week for suspended exams. Nor can additional work be done in order to pass the subject.

The only way to pass the subject is by taking at least 3 of the 4 proposed exams.

IMPORTANT!!!!

Although if you take 3 exams (it is advisable to do all 4 exams) I will give you a final grade for this subject, if a student does not take a test and therefore does not take it, then they will obtain a grade of zero and will lose the percentage of that exam. (The percentages are not redistributed based on the exams that have been taken, he loses directly). Test or exam dates are not postponed.

EXAM 4: 26% (theoretical exam IS NOT A TEST TYPE, IT MUST BE EXPLAINED AND YOU MUST ALSO DO AN EXERCISE).

IN-PERSON EXAM: see 2024 exam calendar

It is a voluntary exam only for those students who, with the first three grades, applying their respective weightings, have already passed the subject. Otherwise, taking this exam will be mandatory.

IN-PERSON EXAM.

- No device (mobile phones, digital cameras, video cameras, etc.) may be used during the exam.
- Any copying system or attempted copying will result in failure of this exam.
- You will not be able to consult the notes or the exercises...nothing.
- According to art. 3.1 of the UdL evaluation regulations, the student cannot use, in any case, during the evaluation tests, unauthorized means or fraudulent mechanisms. The student who uses any fraudulent means related to the test and/or carries electronic devices that are not permitted must abandon the exam or test, being subject to the consequences provided for in these regulations or in any other internal regulations of the UdL.
- If the student does not show up, he or she will receive a grade of zero. The percentages are not redistributed based on the exams presented, he loses directly.
- The dates of the written tests are not postponed.
- You cannot consult any material: no notes, no exercises, no program, nothing.
- It is necessary to return the statement and the solution.
- You can answer questions in both Catalan and Spanish.

EVALUATION WEEK. In-person exam.

VALUE: 26%.

A single exam where there will be theoretical questions that will not be multiple choice, you will have to tell yourself.

Single or alternative evaluation

Assumptions, approved by the Undergraduate Studies Commission on March 28, 2018, for which students can request the alternative evaluation:

- labor
- mobility
- family conciliation
- second or subsequent registration of the subject
- others that the teaching staff of the subject consider appropriate and that may interfere with the correct follow-up of the studies by the student

The essential requirement is that the student submits the request to the teacher responsible for the subject and it is accepted within the period provided for in the Teaching Guide (approximate period of one month from the start of classes).

This request is published on the Faculty website, in the Secretariat section, Administrative documents

subsection: https://www.fdet.udl.cat/export/sites/Fdet/ca/_galleries/Documents/Secretaria-documents/Solicitud-davaluacio-alternativa.pdf

You must send the documentation via email before October 30.

This test will consist of:

- Carrying out A theoretical _ practical EXAM.
- It will not be test type.

Day, time and classroom stipulated in the exam calendar.
