Observations

This subject follows a continuous assessment system. In order to measure the students participation, attendance at the practical classes will be monitored.

The passing of the subject requires approval of both the theoretical part (2 theoretical tests), as the practical part (2 practical tests). Once the two parts have been exceeded, the final grade will be the result of adding the notes

obtained to the theoretical and practical tests.

A student will be qualified with NO PRESENTED if he does not carry out tests and / or activities that represent more than 50% of the subject. In any other case, the final qualification of the student will be the one obtained in these tests and / or activities.

This evaluation system is unique to all students. In the event that a student documentary proof of the impossibility of attending the scheduled activities within the continuation assessment (for reasons of paid work, second or subsequent enrollment of the subject), they may opt for a single test to validate skills and knowledge. It will take place on the day and at the time established in the Degree's evaluation calendar for the final test of the ordinary evaluation. This test will consist of a theoretical written test and a written practice test in which the entire subject matter will be evaluated and to pass it it will be necessary to pass each of the 2 tests with 5 points. The request for this evaluation modality will have to be made before OCTOBER 31, 2023 by means of documentary accreditation and once made, it cannot be modified. **WARNING NOTE:** In accordance with art. 3.1 of the UdL assessment regulations, the student may not use, in any case, during the assessment tests, unauthorized means or fraudulent mechanisms. The student who uses any fraudulent means related to the test and / or electronic devices that are not allowed, must abandon the exam or test, and will be subject to the consequences provided in this regulation or in any other internal regulation of the UdL .
