Subject's extra information

The course as part of the academic plan

This is a compulsory course in the syllabus of the third year of the Business Administration and Management Degree. The study of the financial aspects of the company begins with the course on the Fundamentals of Corporate Finance, in which the students are first introduced to the long-term aspects of strategic and structured finance. The natural continuation of this is the course on Financial Management that studies the problems encountered in corporate financial management concerning the cash flow and managing the working capital. Financial Management gives students in-depth classroom theory on short-term finance and about the financial structure of the company from an operational and liquidity management perspective.

Learning objectives

See competences

Competences

University of Lleida strategic competences

- Correctness in oral and written language.
