

DEGREE CURRICULUM TECHNICAL PROJECTS

Coordination: RINCÓN VILLARREAL, LÍDIA

Academic year 2021-22

Subject's general information

Subject name	TECHNICAL PROJECTS					
Code	101427					
Semester	2nd Q(SEMESTER) CONTINUED EVALUATION					
Туроlоду	Degree		Course	Ch	aracter	Modality
	Bachelor's De Architectural Building Con	Bachelor's Degree in Architectural Technology and Building Construction		COMPULSORY		Attendance- based
Course number of credits (ECTS)	9					
Type of activity, credits, and groups	Activity type	PRAU	_A		TEC	RIA
	Number of credits	3.6			5.	4
	Number of groups	1			1	
Coordination	RINCÓN VILLAR	REAL, LÍDIA				
Department	COMPUTER SCI	ENCE AND INDUST	RIAL ENG	INEE	ERING	
Teaching load distribution between lectures and independent student work	1 ECTS=10 h of i	face-to-face class +	15h of auto	onom	ous work	
Important information on data processing	Consult <u>this link</u> f	for more information.				
Language	Catalan

Subject's extra information

This subjetc consists in the development of a refurbishment project with a change of use of the building and applying sustainability criteria. The different knowledge adquired during the degree must be applied here to a practical case study.

This subject requires of a continuous work during the whole semestre to acomplish the required objectives.

Learning objectives

- To write the documents of a building project correctly, both in terms of grammar and orthography.
- To use an appropriate technical language, both in written documents and in oral presentations.
- To present orally ideas and solutions in a structured and clear way.
- To correctly manage both the personal and team time to develop the established tasks and fulfil the objectives within the given period of time.
- To use correctly the computer tools to development of project and public presentations.
- To determine unknown values and to make realistic assumption of the constructive system based in the available information.
- To apply technical knowledge of construction, refurbishment and sustainability, accordingly to the project.

Competences

Strategic competences of UdL:

- UdL1. Appropriate skills in oral and written language.
- UdL3. Mastering ICT's.
- UdL5. Apply the gender perspective to the functions of the professional field.

Cross-disciplinary competences of the degree:

- EPS1. Capacity to solve problems and prepare and defence arguments inside the area of studies.
- **EPS2.** Capacity to gather and interpret relevant data, within the area of study, to judge and think about relevant subjects of social, scientific and ethical nature.
- EPS6. Capacity of analysis and synthesis.
- EPS7. Capacity to work in situations with a lack of information and/or under pressure.
- **EPS8.** Capacity of planning and organizing the personal work.
- **EPS9.** Capacity for unidisciplinary and multidisciplinary teamwork.
- EPS11. Capacity to understand the needs of the user expressed in a no technical language.
- **EPS13.** Capacity to consider the socioeconomic context as well as the sustainability criteria in engineering solutions.

Specific competences of the degree:

- **GEE35.** Capacity to apply advanced tools needed to compose the different parts of a technical project and its management.
- **GEE36.** Skills to write technical projects of building sites and constructions that do not require architectural projects such us projects of demolition and decoration.
- **GEE37.** Skills to write documents that are part of the executive project created in a multidisciplinary way.
- GEE38. Capacity to analysis executive projects and its use in the execution of works.
- **GEE39.** Knowledge of the roles and responsibilities of the agents that take part in the building process and his professional or business organisation. The administrative procedures, of management and processing.
- **GEE40.** Knowledge of the professional organization and the basic procedures in the field of building and promotion.

Subject contents

1. Project Morphology

- 1.1 The office
- 1.2 The project
- 1.3 Competences of the Building Engineer
- 1.4 Project morphology
- 1.5 Professional office works
- 1.6 Project regulations

2. Building and Uses

- 2.1 Museum
- 2.2 Spa and gymn

3. Refurbishment

- 3.1 General concepts
- 3.2 Applicable regulation and heritage

4. Sustainability

- 4.1 General concepts
- 4.2 Sustainable Construction Criteria
- 4.3 Energy savings and efficiency. CTE-HE Energy savings
- 4.4 Sustainable materials and optimization
- 4.5 Waste treatment and circular economy
- 4.6 Water consumption and saving
- 4.7 Health constrains

5. Application of the CTE

- 5.1 Regulatory framework
- 5.2 SE Structural Safety
- 5.3 SI Fire safety

- 5.4 SUA Security of use and accessibility
- 5.5 HR Noise protection
- 5.6 HS Sanitation

Methodology

The subject is developed using the following methodologies:

- Master class: In master classes the contents are presented orally by the lecturer with no active participation of the students.
- **Project development:** Active learning methodology that fosters the learning based on the development of a project: idea, design, planning, development and evaluation of the project.

	Week	Methodology	Content	Work presentations	Face-to- face/Autonomous work hours
	1	Master class	Subject presentation Groups organization Project morphology		6/9
	2	Master class Project development	Building and uses Workshop		6/9
	3	Master class Project development	Building and uses		6/9
	4	Master class Project development	Sustainability CTE Workshop		6/9
	5	Oral presentation Master class Project development	CTE Workshop	Presentation 1 (08/03/2022)	6/9
	6	Master class Project development	Sustainability CTE Workshop		6/9
7		Master class Project development	Sustainability Workshop		3/4.5
	8	Master class Project development	Sustainability CTE Workshop		6/9
