

Universitat de Lleida

DEGREE CURRICULUM

THE BIOTECHNOLOGY IN PRODUCTION AND ANIMAL HEALTH

Coordination: SERRANO PÉREZ, BEATRIZ

Academic year 2020-21

Subject's general information

Subject name	THE BIOTECHNOLOGY IN PRODUCTION AND ANIMAL HEALTH				
Code	101631				
Semester	1st Q(SEMESTER) CONTINUED EVALUATION				
Typology	Degree		Course	Character	Modality
	Bachelor's Degree in Biotechnology		4	OPTIONAL	Attendance-based
Course number of credits (ECTS)	6				
Type of activity, credits, and groups	Activity type	PRACAMP	PRALAB	PRAULA	TEORIA
	Number of credits	1.5	0.8	0.9	2.8
	Number of groups	1	1	1	1
Coordination	SERRANO PÉREZ, BEATRIZ				
Department	ANIMAL HUSBANDRY				
Teaching load distribution between lectures and independent student work	Presential Hours: 60th Non presential hours: 90th				
Important information on data processing	Consult this link for more information.				
Language	English 90% Catalan 5% (visits) Spanish 5% (visits)				

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention
LÓPEZ HELGUERA, IRENE	irene.lopez@udl.cat	,6	
MORENO MARTÍNEZ, JOSÉ ANTONIO	joseantonio.moreno@udl.cat	,48	
SERADJ , AHMAD REZA	reza.seradj@udl.cat	3,12	
SERRANO PÉREZ, BEATRIZ	beatriz.serrano@udl.cat	3	

Subject's extra information

Recommendations

Understanding English

Learning objectives

Students who pass the course will be able to:

- Learn about the basics of production and animal health, including zoonoses.
- Understand and know the benefits of biotechnology in the prevention, diagnosis, control and eradication of animal diseases (new vaccines and new diagnostic tests)
- Understand and know the benefits of biotechnology in animal reproduction

Students who pass the subject should be able to: (Objectives capacity)

Use materials and equipment suitable for laboratory diagnosis and control of reproduction and of animal diseases.

Competences

The aim of the course is to offer to students who already have knowledge of Animal Physiology, Virology and Immunology, the range of possibilities of biotechnology in production and animal health. We study the benefits of biotechnology in the prevention, diagnosis, control and eradication of animal diseases. We pay special attention to zoonoses (diseases that can be transmitted to humans) and knowledge on the official regulations for farmers to improve animal health and food safety.

General skills

Graduates in Biotechnology must:

- Developing protocols and applications for biotechnology products get interesting animal
- Work in biotechnology companies in the research, development and production of application of animal

Specific skills (according to document content)

- Students should know basic notions of production and animal health.
- Students should know the benefits of biotechnology in the prevention, diagnosis, control and eradication of animal diseases (new vaccines and new diagnostic tests)
- Student should acquire notions of the official regulations so that farmers and consumers will improve animal health and food safety.

Subject contents

PART 1.

Item 1. Introduction to Animal Production Systems. Definition of livestock farm. 2h

Item 2. Basic knowledge of extensive and intensive livestock. 2h

Item 3. Basic knowledge of dairy cattle farms. 2h

Item 4. Basic knowledge of intensive beef cattle. 1h

Item 5. Basic knowledge of pig farms and their management. 2h

Item 6. Basic knowledge of sheep and goats farms 2h

Students will make public presentations. The number of students per group will depend on the number of students in class. They will present a paper during 10 min. like in a Congress communication. 8 h

PART 2.

Item 7. Introduction to reproductive biology. 2h

Item 8. The organization and function of the female and male reproductive system. 2h

Item 9. Endocrinology of male and spermatogenesis. 2h

Item 10. Endocrinology of female and estrus cycle. 2h

Item 11. Pregnancy and parturition 3h

Item 12. Factors affecting fertility and embryonic survival 1h

Practical activities

PART 1

Practice 1. -. Visit to a dairy goat farm and cheese production 4h

<http://www.formatgesdeponent.com/web/ct/noticies.php>

Practice 2. Visit to the Department of Animal Production Laboratory. Study of models of different animal species. 4h

Practice 3. Visit the Laboratory animal's facilities of the University of Lleida (Campus Medicine). 4h

<http://www.udl.es/recerca/oficina/sct/serveis/estabulari.html>

<http://www.udl.cat/recerca/oficina/newsletter/documents/Estabulari.pdf>

PART 2

Practice 4. Anatomy and histology of female and male reproductive system. 2h

Practice 5. Semen evaluation methods in cattle. 2h

Practice 6. Synchronization technologies of estrus and ovulation 2h

Practice 7. Ultrasound scan technology associated to animal reproduction. 2h

Methodology

Type of activity	Description	Classroom Student work		Student Work outside of the classroom		Evaluation	Total Time
		Objectives	Hours	Student work	Hours	Hours	Hours
Lectures	Lecture (Class. Large group)	Explanation of the main concepts	28	Study: Learn, understand and synthesize knowledge	28	4	60
Problems and cases	Class participation (Class. Large group)	Problem solving	0	Learning how to solve problems	0		0
Seminars	Class participation (Medium- sized group)	Activities of discussion or implementation	0	Problem solving and discussion	0		0
Lab	Laboratory Practice (Medium- sized group)	Implementation of the practice: to fully understand, measure ...	8	Study and monography writing	8	1	17
Computer room	Computer classroom practice (Medium- sized group)	Implementation of the practice: to fully understand, measure ...		Study and monography writing			
Field Work	Practice Fieldwork (Medium- sized group)	Implementation of the practice: to fully understand, measure ...	0	Study and monography writing	0		0
Visits	Visit farms or industries	Making the Visit	15	Study and monography writing	5		20
Guided Activities	Student work (individual or group)	Guiding Student study (in tutoring hours)	9	bibliographic work, study, etc.	40	4	53
Others							
Totals			60		78	9	150

Development plan

The course is structured in two blocks of knowledge that include theoretical and practical laboratory activities, seminars and visits. The calendar developed by the Directorate of Studies will be strictly followed.

Theoretical activities will be taught in person or non-presential through the Virtual Campus videoconference tool.

The practical activities will be face-to-face:

- Dissection room and Histophysiology Laboratory: ETSEA, building 1, floor 0, laboratory 1 (1.0.01).
- Microscope classroom: ETSEA, SHV building, floor 2, classroom 02 (2.2.02).
- Animal production Laboratory: ETSEA, building 1, floor 1, laboratory 09 (1.1.09).

It is MANDATORY that students wear the following personal protective equipment (PPE) during the teaching practices:

- White lab coat.
- Chemical / biological protection gloves (Physiology block)
- Mask

NOTE - Please be aware of changes regarding schedules in the classroom or virtualization of activities to adapt to any change in the health situation.

Evaluation

Exams	Practices	Case studies and problems	Other activities
60%	26%	14%	

Activity type	Grading System		Grading weight
	Procedure	Number	(%)
Lectures	Written tests on theory syllabus	2	60
Problems and cases	Paper delivery or exams about test cases	8	26
Seminars	Written or oral evidence	0	
Lab	Delivery reports, written or oral evidence	0	
Computer room	Delivery reports. Written or oral tests.		
Field Work	Delivery reports. Written or oral evidence	4	
Visits	Delivery reports. Written or oral tests.		
Guided Activities	Delivery of work	1-2	14
Others			

Total			100
-------	--	--	-----

SUMMARY of EVALUATION

Exams: 60% (30% R. Seradj and 30% B.Serrano). Classes + Questions related to your own presentation and other presentations at your choice (R. Seradj)

Practices: 26 % (13% R. Seradj +JA.Moreno and 13% B.Serrano + I.López). Presentation evaluation+ Attendance + test of each practice or visit (C.Nogareda) . Attendance, tests.... (B.Serrano)

Cases and problem analysis: 14% (7% R. Seradj and 7% B.Serrano). Glossary questions (R. Seradj) and Activities during the classes (B.Serrano)
