## Bibliography

### Recommended bibliography

Given the variety of subject areas covered by Administrative Law II, it is very complex to recommend a book or manual that can serve as a guide to all sections of the syllabus. In this manner, in line with the exposition of different issues, the most appropriate bibliographical source will be noted to complement the theoretical explanations. Nevertheless, it is important to highlight the references to two manuals in which you can find a very accomplished explanation of much of the contents:

- GARCÍA DE ENTERRÍA, E. y FERNÁNDEZ RODRÍGUEZ, T.R., *Curso de Derecho Administrativo*, Civitas, Madrid, vol. I y vol. II.
- SANTAMARÍA PASTOR, J.A., *Principios de Derecho Administrativo General*, Iustel, Madrid, vol. I y vol. II.
- Particularly useful also is consulting the various introductions incorporated in the legislative collections of Administrative Law, ed. Aranzadi, authored by Prof. L. MARTÍN REBOLLO.

Remember that it is important when buying or consulting these three works that are constantly renewed, to keep in mind their edition in order to incorporate the latest legislative and doctrinal guidelines and recent case laws.

With regard to legislative material, many compilations are on the market. Among them, particularly successful is that published by Aranzadi (Administrative Law), as outlined above. Additionally, the student must handle some regulations that are not collected, as well as Catalan legislation, which will be duly marked.
