Methodology

The subject has an eminently practical development. While most of the sessions are introduced with a series of theoretical contents, the assimilation of concepts is acquired through the practical exercises that are entrusted both inside and outside the classroom. At the same time, reflection on the preparation and execution of tasks is another key element in learning.

Therefore, the bulk of the subject is conceived as a workshop where you work in the same way as in a television newsroom.

The health emergency situation generated by Covid means that half of the sessions of the subject are non-face-to-face, but with follow-up by videoconference.

Development plan

Given the exceptional situation generated by the health crisis of the Covid-19, the usual development of the subject may be altered.
