Subject's extra information

NOTICE: all the planning contained in this teaching guide may be altered for health reasons.

In case of confinement, the face-to-face sessions will become telematic. In the event of a considerable improvement in the situation generated by Covid, all sessions can become face-to-face.

The subject is conceived as a workshop where journalistic contents are elaborated that could have an outlet in professional media. That is, under the guidance of teachers, students will have to create news, reports, documentaries. To do this, they will have to follow the different stages of production, from the idea to the documentation, writing, recording, editing, etc.

Subject contents

- Review of previous knowledge. Basic concepts of journalism.
- Brainstorming projects and definition of the editorial project.
- Production design of the project.
- Preproduction and management of the necessary tools to develop the project.
- Configuration of teams and distribution of tasks.
- Editorial Board.
- Location of scenarios and sources.
- Documentation and previous script
- Carry out interviews, shootings and sessions of recordings and photography.
- Execution of the project.

Methodology

The class group will be configured as a newsroom that must define the contents and the organization and the means to develop them. Therefore, you must know how to move from the idea to the product, going through all stages of production. Under the guidance of the teacher, each phase will be debated and tasks will be assigned to the components. The subject presupposes an important dose of autonomy for students to prepare their products, but face-to-face sessions should serve to put them in common, raise doubts and correct approaches, if applicable. Theoretical sessions will be reinforced in a timely manner those aspects that are not considered sufficiently consolidated or that require the acquisition of new knowledge.

The critical visualization of the elaborated contents will be another of the learning tools.

To do this, different work groups for radio, television, web and multimedia will be configured. A project will be planned, a production design will be made and the different stages of production will be followed, from documentation to interviewing, filming, photographic sessions, etc. An execution period will be established with a closing date. And

the characteristics and needs of the means in which the final products will be published will be taken into account at all times.

The health emergency situation generated by Covid means that half of the sessions of the subject are non-face-to-face, but with follow-up by videoconference.
