Learning objectives

Acquiring knowledge about computer system´s management.

The practical knowledge will be acquired based on the Linux operating system.

Theoretical knowledge will be closely linked to the concepts needed to carry out the practice.

Competences

Cross-disciplinary competences:

- **EPS1.** Capacity to solve problems and prepare and defence arguments inside the area of studies.
- **EPS6.** Capacity of analysis and synthesis.
- **EPS9.** Capacity for unidisciplinary and multidisciplinary teamwork.

Specific competences:

- **GII-CRI2.** Capacity to plan, conceive, deploy and direct projects, services and computer systems in all the fields, leading his set up and his continuous improvement and evaluation his economic and social impact.
- **GII-CRI5**. Knowledge, manage and maintain systems, services and computer applications.
- **GII-CRI10.** Knowledge of the characteristics, functionalities and structures of the operating systems and design and implement applications based in their services.

Subject contents

THEORY

Theme 1: Fylesystem

Theme 2: Security and Protection

PRACTICES

1. /PROC filesystem
2. Sed. Awk
3. Debian-Ubuntu
4. PC Architecture. The Linux kernel
5. Swap. Disk RAM

6. RAID -Redundant Array of Inexpensive Discs-
7. Quota. Cron
8. Priority and Nohup
9: Managing/Installation of Mysql and Postgres
10 LVM -Logical Volume Manager-
11. Firewalls
12. Servers

Methodology

The development of the course consists of:

1. Theory and problems in large-group classes, and

2. Practices of Linux operating system administration in medium-group classes in the laboratory.

Theory and problems evaluation will be done according to two partial examens. Practices evaluation will be carried out by delivering 10 practices in groups of two students. In addition, each partial exam will contain a question of practices equivalent to 25% of the exam.

Development plan

Week	Activity Attended GG	Activity Attended (GM)
1	**Introducing course**	Free
2	**Filesystem**	Practice 1. Proc
3	**Filesystem**	Practice 2. Sed-Awk
4	**Filesystem**	Practice 3. Debian-Ubuntu
5	**Filesystem**	Practice 4. PC architecture. Linux kernel
6	**Filesystem**	Practice 5. Swap-Dram
7	**Filesystem**	Practice 6. Quota-Cron
8	**Filesystem**	Practices Retrieval
9	**1st Exam**	**1st Exam**
10	**Security and Protection**	Practice 7. RAID
11	**Security and Protection**	Practice 8. Priority-Nohup
12	**Security and Protection**	Practice 9. MySQL, Postgres
13	**Security and Protection**	Practice 10. LVM
14	**Security and Protection**	Practice 11. Firewalls
15	**Security and Protection**	Practice 12. Servers
16	**Security and Protection**	Practices Retrieval

17	2nd Exam	2nd Exam

Evaluation

10%	Requested practices (10 practices in total)
45%	Partial exam. 25% will correspond to the practices done.
45%	Partial exam. 25% will correspond to the practices done.

Alternative Evaluation

Students who have the approval to be assessed through alternative assessment (see requirements and procedure in the assessment regulations) must carry out the following activities.

There will be a single written test that will contain all the practical and theoretical content of the subject. This written test will have a weight of 100% and will be carried out on the day reserved in the calendar for the completion of the second part of the subject (consult the exam calendar for more information).

The recovery will also be a written test with a weight of 100% and will be carried out on the day reserved in the calendar for the recovery of the second part of the subject (consult the exam calendar for more information).
