

Universitat de Lleida

DEGREE CURRICULUM
**LANGUAGES, AUTOMATA AND
GRAMMARS**

Coordination: MIRET BIOSCA, JOSE MARIA

Academic year 2017-18

Subject's general information

Subject name	LANGUAGES, AUTOMATA AND GRAMMARS			
Code	102062			
Semester	2nd Q(SEMESTER) CONTINUED EVALUATION			
Typology	Degree	Course	Typology	Modality
	Double bachelor's degree: Degree in Computer Engineering and Degree in Business Administration and Management	2	COMPULSORY	Attendance-based
	Bachelor's Degree in Computer Engineering	2	COMPULSORY	Attendance-based
ECTS credits	4,5			
Groups	1GG,2GM			
Theoretical credits	3			
Practical credits	1.5			
Coordination	MIRET BIOSCA, JOSE MARIA			
Department	MATEMATICA			
Teaching load distribution between lectures and independent student work	4,5 ECTS correspond to a workload of 45 h of lectures and assesment and 67 h of autonomous study work for each student.			
Important information on data processing	Consult this link for more information.			
Language	Preferably in Catalan. Lectures can be given in Spanish or English, if required.			
Distribution of credits	Josep M. Miret lectures 3ECTS in the main group, and two split groups of 1.5 ECTS. Hence, the global workload assigned to the lecturer is of 6 ECTS.			

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention
MIRET BIOSCA, JOSE MARIA	miret@matematica.udl.cat	6	Office 1.16. Agree an appointment by e-mail.

Subject's extra information

Previous knowledge on the subjects *Algebra*, *Computational Logics* and *Discrete Mathematics* is recommended.

This subject is scheduled in the second semester of the 2nd year

The knowledge and competencies acquired in this subject will be useful to follow other subjects in the specialisation on *Computing*, and in particular for the subjects *Computational Models and Complexity* and *Language Processing Algorithms*.

Competences

GII-FB3. Capacity to understand and master the basic concepts of discrete mathematics, logical, algorithmic and computational complexity, and its application to solve engineering problems.

EPS5. Capacity of abstraction and of critical, logical and mathematical thinking.

Subject contents

1. Alphabets and languages

- Alphabets, words and languages.
- Concatenation of words.
- Universal language.
- Operations with languages.
- Kleene star of a language.

2. Finite Automata

- Deterministic finite automata.
- Accepted language by a deterministic finite automaton.
- Indeterministic finite automata.
- Determinization of finite automata.
- Minimization of finite automata.
- Operations with regular languages.
- Regular Expressions.

3. Context free grammars

- Generated language by a context free grammar.
- Operations with context free languages.
- Ambiguous grammars.
- Elimination of null productions, unit productions and useless symbols.
- Chomsky normal form.
- Regular grammars.

4. Pushdown automata

- Deterministic pushdown automata.
- Indeterministic pushdown automata.
- Accepted language by a pushdown automata.

Methodology

Theoretical and practical contents are mixed for the sake of combining basical aspects with illustrative examples and problem solving. Problem solving combines joint resolution on the blackboard or individual resolution. Some sessions will be devoted to group problem solving.

Development plan

Week	Lesson	Activities	student workload
1	Introduction. Lesson 1	Lectures	2 hours. Study and problem solving.
2	Lesson 1	Lectures and problem sessions	3 hours. Study and problem solving.
3	Lesson 2	Lectures and problem sessions	3 hours. Study and problem solving.
4	Lesson 2	Lectures and problem sessions	3 hours. Study and problem solving.
5	Lesson 2	Lectures and problem sessions	3 hours. Study and problem solving.
6	Lesson 2	Lectures and problem sessions	3 hours. Study and problem solving.
7	Lesson 2	Lectures and problem sessions	3 hours. Study and problem solving.
8	Lesson 3	Lectures and problem sessions	6 hours. Study for exams.
9		Partial 1 assessment	8 hours. Study for exams.
10	Lesson 3	Lectures and problem sessions	3 hours. Study and problem solving.
11	Lesson 3	Lectures and problem sessions	3 hours. Study and problem solving.
12	Lesson 3	Lectures and problem sessions	3 hours. Study and problem solving.
13	Lesson 3	Lectures and problem sessions	3 hours. Study and problem solving.
14	Lesson 4	Lectures and problem sessions	3 hours. Study and problem solving.
15	Lesson 4	Lectures and problem sessions	6 hours. Study for exams.
16		Tutorization	6 hours. Study for exams.
17		Partial 2 assessment	8 hours. Study for exams.
18		Tutorization	
19		Final assessment	

Evaluation

Acr.	Assessment activities	Weight	Minimum mark	Resit

P1	Partial 1. Lessons 1, 2	4.5 points	1 point	Yes
P2	Partial 2. Lessons 3, 4	4.5 points	1 point	Yes
AC	Complementary activities : complementary reading or attending conferences or exhibitions on related topics or develop a work on complementary aspects.	1 point	No	No
PCL	Active participation	0.5 points	No	No

Final Mark = P1 + P2 + AC+ PCL

A student with final mark below 5 or who has not reached the minimum marks required, can resit either P1, P2 or both. Up to 0.5 additional points can be assigned, according to participation in the classroom and delivered problems.
