

# DEGREE CURRICULUM GRAPHIC EXPRESSION I

Coordination: CABISCOL TEIXIDO, MARIA ALBA

Academic year 2016-17

## Subject's general information

Subject name	GRAPHIC EXPRESSION I				
Code	102106				
Semester	1st Q(SEMESTER) CONTINUED EVALUATION				
Typology	Course	Typology	Modality		
	Bachelor's Degree in Automation and Industrial Electronic Engineering	1	COMMON	Attendance- based	
	Bachelor's Degree in Mechanical Engineering	1	COMMON	Attendance- based	
ECTS credits	9				
Groups	2GG,5GM				
Theoretical credits	5.4				
Practical credits	3.6				
Coordination	CABISCOL TEIXIDO, MARIA ALBA				
Department	INFORMATICA I ENGINYERIA INDUSTRIAL				
Teaching load distribution between lectures and independent student work	1 ECTS = 10 hours of lectures + 15 hours of independent student work				
Important information on data processing	Consult this link for more information.				
Language	Catalan				
Office and hour of attention	Appointments can be asked via e-mail.				

Professor/a (s/es)	Adreça electrònica professor/a (s/es)	Crèdits	Horari de tutoria/lloc
CABISCOL TEIXIDO, MARIA ALBA	alba@diei.udl.cat	23,4	Make an appointment with the teacher by e-mail.
SOL FELIP, SALVADOR	ssol@diei.udl.cat	5,4	Make an appointment with the teacher by e-mail.

### Subject's extra information

Continuous work is recommended in order to achieve the objectives of the course, as well, frequently visit the Virtual Campus because, information related to the subject will be announced and teaching materials will be provided. There are no prerequisites for this course.

### Learning objectives

- Apply the descriptive geometry techniques.
- Apply the parallel orthographic projection representation techniques.
- Be able to visualize and interpret 3-dimensional physical elements.
- Be able to interpret and obtain parallel orthographic projection views of both simple and complex objects.
- Be able to interpret and represent mechanical object drawings and mechanical assemblies using UNE normative.
- Develop skill in handling conventional drawing instruments.
- Acquire skills in freehand sketching.
- Acquire skills in using program computer-aided design.

### Competences

#### University of Lleida strategic competences

• UdL3: Master Information and Communication Technologies.

#### Degree-specific competences

• GEEIA5/GEM5: Have spatial awareness and knowledge of the techniques of graphic representation, the traditional methods of metric and descriptive geometry, and the application of computer assisted design.

### Subject contents

The table of contents is structured as follows:

#### THEMATIC BLOCK I: Descriptive geometry

THEMATIC BLOCK II: Standardization. Industrial drawing

THEMATIC BLOCK III: Computer aided design (CAD)

#### **THEMATIC BLOCK I: Descriptive geometry**

#### 1. Representation systems fundamentals

#### 2. Multiview orthographic projections

- 2.1. Fundamentals
- 2.2. Point representation
- 2.3. Line representation
- 2.4. Plane representation
- 2.5. Intersections
- 2.6. Parallelism
- 2.7. Perpendicularity
- 2.8. Distances
- 2.9. Folding down planes
- 2.10. Plane changes
- 2.11. Rotations

#### THEMATIC BLOCK II: Standardization. Industrial drawing

#### 3. Introduction to technical drawing

- 3.1. Technical drawing fundamentals
- 3.2. Standaritzation fundamentals. Types of drawings

#### 4. Orthographic views

- 4.1. Projection systems
- 4.2. View selection

#### 5. Dimensioning

#### 6. Particular, auxiliary, local and partial views

#### 7. Sectional views

- 7.1. Fundamentals
- 7.2. Sectional types

#### 8. Screw and thread standard representation

#### THEMATIC BLOCK III: Computer aided design (CAD)

#### 9. CAD fundamentals

- 10. Starting AutoCAD
- 11. Object construction
- 12. Editing and organitzation
- 13. Text, hatching and dimensioning
- 15. Isometric drawings

### Methodology

The teaching methodology consists of:

• Lecture class and problems: These classes are held in large groups and consist of combined lectures with the aim of exposing theoretical aspects, with problems classes, in which problems are solved in order to consolidate the theoretical learning aspects.

• **Practices:** These classes are held in groups of smaller size in the CAD Lab. In this classes, the student can put into practice the theoretical aspects and be able to solve real problems using computer aided design tools (CAD).

• Evaluation System: The teaching methodology used in the evaluation system includes written tests and practical tests.

### Development plan

Week	Methodology	Contents	Lecture Hours	Independent Student Work Hours
1	Lecture, problems and practices	Lesson 1: Representation systems fundamentals Lesson 2: Multiview orthographic projections. Section 2.1, 2.2 and 2.3 Practice CAD nº 1 (Lesson 9)	6	9
2	Lecture, problems and practices	Lesson 2: section 2.4 Practice CAD nº 2 (Lesson10)	6	9
3	Lecture, problems and practices	Lesson 2: section 2.5 i 2.6 Practice CAD nº 3 (Lesson 10)	6	9
4	Lecture, problems and practices	Lesson 2: section 2.6 i 2.7 Practice CAD nº 4 (Lesson 10)	6	9
5	Lecture, problems and practices	Lesson 2: section 2.7 i 2.8 Practice CAD nº 5 (Lesson 10)	6	9
6	Lecture, problems and practices	Lesson 2: section 2.9 Practice CAD nº 6 (Lesson 10)	6	9
7	Lecture, problems and practices	Lesson 2: section 2.9 i 2.10 Practice CAD nº 7 (Lesson 10 and 11)	6	9

8	Lecture, problems and practices	Lesson 2: section 2.11 Practice CAD nº 8 (Lesson 10, 11 and 12)	6	9
9	Written Test	Exams (Exam-1)		
10	Lecture, problems and practices	Lesson 3: Introduction to technical drawing. Practice CAD nº 9 (Lesson 10, 11 and 12)	6	9
11	Lecture, problems and practices	Lesson 4: Orthographic views Practice CAD nº 10 (Lesson 13 and 14)	6	9
12	Lecture, problems and practices Practical Test	Lesson 5: Dimensioning CAD Test-1 <b>(CAD-1)</b>	6	9
13	Lecture, problems and practices	Lesson 6: Particular, auxiliary, local and partial views Practice CAD nº 11	6	9
14	Lecture, problems and practices	Lesson 7: Sectional Views Practice CAD nº 12	6	9
15	Lecture, problems and practices Practical Test	Lesson 8: Screw and thread standard representation CAD Test-2 <b>(CAD-2)</b>	6	9
16	Written Test	Exams (Exam-2)		
17	Written Test	Exams (Exam-2)		
18		Tutorial Time		
19	Written Test	Recovery Activities (RE)		

### Evaluation

The evaluation method consists of:

- Exam-1: The exam will evaluate contents of Block I, and it will be held during 9th week. This exam has a percentatge over the final mark of 35%.
- **Exam-2**: The exam will evaluate contents of Block II, and it will be held during 16th and 17th week. This exam has a percentatge over the final mark of 45%.
- CAD-1 and CAD-2: To evaluate the block III, there will be two practical tests, CAD-1 and CAD-2, in the laboratory of CAD. These tests have a percentage over the final mark of 10% respectively.

The subject's final mark will be obtained as the sum of all percentages explained above, following the next mathematical expression:

**Final Mark = 35% Exam-1 + 45% Exam-2 + 10% CAD-1 + 10% CAD-2**, (the minimum grade for Exam-1 and Exam-2 is 2.5 to 10)

The course will be overcome by obtaining a final mark equal or greater than 50%.

In the event that the final mark does not exceed 50%, the student may make a recovery exam, **RE**, corresponding to the contents of the block I and II, with a percentage over the final mark of 80%. This exam will take place during 19th week. The contents evaluated in the recovery exam will be divided into two parts, Block I contents and Block II contents. The minimum grade to pass is 2.5 to 10 in each of the blocks.

### Bibliography

#### **Basic bibliography**
