

Universitat de Lleida

DEGREE CURRICULUM SENSORY EVALUATION TECHNIQUES

Coordination: ROMERO FABREGAT, MARIA PAZ

Academic year 2021-22

Subject's general information

Subject name	SENSORY EVALUATION TECHNIQUES			
Code	102253			
Semester	2nd Q(SEMESTER) CONTINUED EVALUATION			
Typology	Degree	Course	Character	Modality
	Bachelor's Degree in Food Science and Technology	3	OPTIONAL	Attendance-based
Course number of credits (ECTS)	6			
Type of activity, credits, and groups	Activity type	PRALAB	PRAULA	TEORIA
	Number of credits	1	4	1
	Number of groups	1	1	1
Coordination	ROMERO FABREGAT, MARIA PAZ			
Department	FOOD TECHNOLOGY			
Teaching load distribution between lectures and independent student work	Hores presencials: 60 Hores no presencials: 90			
Important information on data processing	Consult this link for more information.			
Language	Castellà			

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention
ROMERO FABREGAT, MARIA PAZ	mariapaz.romero@udl.cat	4	
SALVIA TRUJILLO, LAURA	laura.salvia@udl.cat	2	

Subject's extra information

Tècniques de l'avaluació sensorial és una assignatura optativa dels plans d'estudi del Graduat en Ciència i Tecnologia d'Aliments. L'avaluació sensorial és una tecnologia que té per objectiu la determinació de les propietats sensorials o organolèptiques dels aliments, és a dir, la repercussió produïda sobre els diversos receptors sensorials estimulats durant i després de la ingestió d'aliments, i la recerca de les preferències o aversions provocades per aquestes propietats sensorials.

L'assignatura està dirigida a estudiants que vulguin incorporar-se professionalment en el camp de l'R+D i en el control de qualitat. No s'ensenya a tastar, s'ensenyen els procediments per a executar correctament els estudis sensorials, des de quin atribut o atributs avaluar, quin tipus de jutge és el més adequat i com seleccionar-lo, com desenvolupar les proves i com processar les dades fins a com elaborar els resultats.

Requisits per a cursar-la

Nivell d'anglès que permeti manejar nombrosa documentació escrita i bibliografia en anglès.

Learning objectives

The student who passed this subject will be able to:

1. To argue the necessity and importance of sensory evaluation in the scope of quality control and development of nous productes
2. Conèixer els mechanisms of perception of the taste and the smell.
3. Defining the sensorial attributes and the impact on the quality of the food.
4. Identify sensorial descriptors
5. Plan and execute proves sensorials amb alimentants.
6. Select and train judges to be part of tast panels.
7. Associate an experimental design with the correct statistical tractament.
8. Analyze and interpret results of sensory evaluation.
9. Prepare reports on sensorial proves.

Competences

Basical skills

It will contribute to the achievement of the following basic competencies:

CB1: That the students have demonstrated their understanding of connections starting at the base of the general secondary education at a level that, if it is based on text advancements, also includes some aspects that involve connections coming from the guardian 'this area.

CB2: That the students need to apply their connections to their treball or vocation in a professional way and after the competencies that tend to demonstrate per mitjà de l'elaboració i defense d'arguments i la solució de problemes dins la seva àrea d'estudi

CB3: That the students have the ability to gather and interpret fillings per emetre judicis that included one that reflected on filling topics of a social, scientific or ethical nature.

CB4: That the students puguen transmit information, ideas, problems and solutions to a public both special and non-specialized.

CB5: That the students have developed the skills of apprenticeship that are necessary for the subsequent study of a high level of autonomy.

General skills

CG1. Analyze specific situations, define problems, make decisions and implement action plans in search of solutions.

CG2. Interpret studies, reports, data and analyze them numerically.

CG3. Select and manage the available written and computerized sources of information related to the professional activity.

CG4. Work alone and in a multidisciplinary team.

CG5. Understand and express themselves with the appropriate terminology.

CG6. Discuss and argue in various forums.

CG8. Value comprehensive training, personal motivation and mobility.

CG9. Analyze and assess the social and ethical implications of professional activity.

CG10. Have a critical and innovative spirit.

Transversal skills

CT1: Present information correctly orally and in writing

CT3: Use the computer systems and the existing communication with support for the development of the seva professional activity

CT4. Respect the fundamental rights of equality between men and women, the promotion of Human Rights and the values of a culture of peace and democratic values.

Specific skills

The subject will contribute, together with others, to the achievement of many specific skills, highlighting specific competences of module 3: Food Science

CE1. Select and apply the physical and mathematical foundations necessary for the development of other disciplines and the activities of the profession.

CE3. Identify and apply the fundamentals of Biology and Human Physiology necessary for the development of other disciplines and the activities of the profession.

CE4. Select and apply the basic concepts of the statistical method, being able to statistically analyze the results of studies and interpret them critically.

CE5. Apply the basic processes of a laboratory and use equipment, handle reagents, meet safety conditions and prepare reports.

CE6. Posing and solving problems by correctly applying the concepts acquired to specific situations.

CE14. Recognize the chemical composition of food and its chemical reactions.

CE15. Relate the composition of foods with their physical, chemical and technological properties.

CE16. Interpret the physical, chemical and biochemical transformations that occur throughout the manufacturing and storage processes.

CE17. Select and apply the methods and instrumentation for the physical-chemical and sensory analysis of food.

Subject contents

- **CONTENTS**

Unit 1. Introduction to sensory techniques.

Introduction. Sensory evaluation in the food industry. ISO i UNE regulations.

Unit 2. Sensory Attributes .

Introduction. terminology for food description: visual aspects, odor-aroma, flavor and texture. Flavor and texture profile methodologies.

Unit 3. Controls for sensory studies.

Introduction. Tests room. Products controls. Panelist controls.

Unit 4. Physiological and psychological factor.

Unit 5. Measuring responses.

Introduction. Ranking and scaling. New hedonic scales. Thresholds determination.

Unit 6 Basic statistical methods.

Statistical hypothesis testing. Statistical design: sampling, blocking an experimental design. More usual experimental designs. Normal and binomial distributions. Non parametric methods. Analysis of variance.

Unit 7. Discriminative test: overall differences.

Introduction. Triangle test. Duo-trio test. Same/Different test. A-noA test. Difference from control test. Sequential tests.

Unit 8. Discriminative test: attribute differences.

Introduction. Paired sampling test: Comparing two samples and pair wise ranking test. Comparing more than two samples. ranking and rating tests in several designs (RBD, BIB, split-plot)

Unit 9. Selection and training of panelists.

Introduction. Guidelines to select and train panel members for discriminative and descriptive test. Panel

performance controls.

Unit 10. Descriptive test.

Introduction. Components of descriptive analysis. Commonly used descriptive test methods. The Spectrum and QDA methods.

Unit 11. Affective test.

Introduction.. Field of application. The consumer panel. The test location. Qualitative and quantitative affective methods. Protocol design for consumer studies.

Unit 12 Sensory shelf-life estimation of foods.

Design of sensory shelf-life experiments. Cut-off point methodology. Accelerate storage. Survival analysis.

Unit 13 Sensory evaluation in product development

Case-study: development a product.

Unit 14. Guides for the selection of sensory tests

Introduction. Project and test objectives. Summary of the area of application of sensory tests.

Unit 15. Guides to report results.

Introduction. Summary. Objective. Experimental. Results and discussion.

• PRACTICAL ACTIVITIES

COMPUTER BASED ACTIVITIES

The aim of this activities is to provide basic knowledge of statistic aplied to sensory evaluation of foods.

P1: Working with statistial tables

P2: Statistical hypothesis testing

P3: The binomial test: applicatons in sensory differene and preference testing.

P4: Non parametric test: Friedman, Wilcoxon

P5: Analysis of variance: randomized, two factors with and without interactions and spli-plot designs

TASTING ROOM ACTIVITIES

P1: Aroma identification

P2: Test organization

P3: Matching test: flavor

P4 i 5: Discriminative test with two samples

P6: Samples presentation: complets and incomplete designs.

P7 i 8: Discriminative test with more than two samples

P9: Sequential test .

P10:Determining threshold

GROUP WORK

Afective test with students of the ETSEA campus.

Analysis of one research article related with descriptive analysis

SEMINAR

Cases study

Methodology

Tipus d'activitat	Descripció	Activitat presencial alumne		Activitat no presencial alumne		Avaluació	Temps total/ECTS
		Objectius	Hores	Treball alumne	Hores		
Lliçó magistral	Classe magistral (Aula. Grup gran) Exposició per part de la professora dels 5 primers temes del programa	Explicació dels principals conceptes	8	Estudi: Conèixer, comprendre i sintetitzar coneixements	8	1	17
Problemes i casos	Explicació per part de la professora de les diferents proves sensorials (temes 6 a 12) amb resolució d'un exemple per a explicar el procediment d'anàlisi de resultats	Descriure els procediments de cada una de les proves sensorials Interpretar resultats	12	Aprendre a resoldre problemes i casos	20	2	22
Problemes i casos	Classe participativa Resolució de problemes i casos relacionats amb cada una de les proves sensorials estudiades		20	Aprendre a resoldre problemes i casos. Adquirir habilitat en el maneig d'eines per al càlcul estadístic (Excel i paquets estadístics)	30	2	86
Seminari	Classe participativa (Grup mitjà) Casos pràctics relacionats amb els temes 13 a 15	Dissenyar un protocol complet que inclogui la selecció de varies proves d'avaluació sensorial, com eina per a la prenda de decisions previes al llançament d'un producte	8	Resoldre problemes i casos. Discutir resultats	6	1	15
Sala de cata	Pràctiques en sala de tast Grup petit (fins 12 estudiants)	Preparar fitxes de cata. Executar cada prova sensorial Entendre-la	10	Processar els resultats de la prova sensorial assignada a cada estudiant i realitzar la memòria	2	1	13

Activitats dirigides	1.- Treball individual: anàlisis d' un article 2.- Treball individual: Desenvolupament d'una prova sensorial afectiva	Orientar a l'alumne en l'anàlisi crític d' un article d' investigació sobre evaluació sensorial. Descriure la metodologia per a per a portar a terme un estudi afectiu	2	Localitzar en les bases dedades i seleccionar un article científic Llegir-lo i interpretar-lo Realitzar un anàlisi crític Planificar i executar una prova. Elaborar l' informe final	15	2	19
Totals			60		81	9	150/6

Evaluation

PERSONAL WORK (25%)

Basic statistical exercises applied to sensory evaluation (10%)

Critical study of a descriptive trial (5%)

Practice booklet (10%)

WORK FOR COUPLES (20%)

Affective test (10%)

Useful life test (10%)

EXAMS (55%)

Theoretical-practical exam of the contents of the first 5 topics (20%)

Exam Problems discriminatory tests (T7 and T8) (25%)

Written test related to judge selection protocols (10%)

NOTE: To pass, you must obtain an average grade greater than or equal to 5, and a grade equal to or greater than 4 in the problem tests
