Subject's extra information

Subject that is studied in the 2nd semester of the 3rd year of the Degree in Industrial and Logistics Organization. It corresponds to the Subject "Business Management" within the Module "Specific Technology Training: Industrial and Logistics Organization".

Subject that requires continuous work throughout the semester in order to achieve the stated goals. Critical thinking and abstract reasoning abilities are required.

It is recommended to frequently visit the Virtual Campus space associated with the subject as all the corresponding information is announced.

Learning objectives

The aim of this subject is to introduce students to the field of study of Strategic Direction, offering a general vision of the company from the perspective of top management. The main purpose of Strategic Direction is to help organizations and their managers to develop and implement strategies that allow the organization to position itself in the market and obtain economic, social and environmental benefits.

Learning outcomes:

- Acquire knowledge about the most important models of strategic analysis, their uses and their limitations.
- Know the main interrelations between the different disciplines of management from a global perspective.
- Have a critical and reflective vision on the concepts of management and business management.
- Know about strategies for business expansion and diversification

Competences

B02: That students know how to apply their knowledge to their work or vocation in a professional manner and possess the skills that are usually demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study.

B04: That students can transmit information, ideas, problems and solutions to a specialized and non-specialized public.

CG2: Direct the activities object of the engineering projects described in the previous section.

CG9: To organize and plan in the field of the company, and other institutions and organizations.

CE20: To have applied knowledge of basics and principles of strategic planning.

CT04: Apply basic knowledge of entrepreneurship and professional environments.
