

Universitat de Lleida

DEGREE CURRICULUM **INTEGRATED PRACTICES II**

Coordination: FERNANDEZ LOPEZ, MARIA CRISTINA

Academic year 2023-24

Subject's general information

Subject name	INTEGRATED PRACTICES II					
Code	102428					
Semester	2nd Q(SEMESTER) CONTINUED EVALUATION					
Typology	Degree	Course	Character		Modality	
	Bachelor's Degree in Forest Engineering	2	COMPULSORY		Attendance-based	
	Double degree: Bachelor's degree in Forest Engineering and Bachelor's degree in Nature Conservation	2	COMPULSORY		Attendance-based	
Course number of credits (ECTS)	6					
Type of activity, credits, and groups	Activity type	PRACAMP	PRALAB	PRAULA		TEORIA
	Number of credits	0.9	2.4	1.4	1	0.3
	Number of groups	1	3	1	2	1
Coordination	FERNANDEZ LOPEZ, MARIA CRISTINA					
Department	AGRICULTURAL AND FOREST SCIENCES AND ENGINEERING					
Important information on data processing	Consult this link for more information.					

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention
AGUILERA DELGADO, MÒNICA	monica.aguilera@udl.cat	2,5	
BALASCH SOLANES, JOSE CARLOS	josepcarles.balasch@udl.cat	,6	
FERNANDEZ LOPEZ, MARIA CRISTINA	cristina.fernandez@udl.cat	2,3	
FERNANDEZ SERRANO, ALVARO	alvaro.fernandezserrano@udl.cat	1,2	
LOPEZ ALONSO, RAUL	raul.lopez@udl.cat	1,9	
MARTINEZ CASASNOVAS, JOSE ANTONIO	joseantonio.martinez@udl.cat	3,3	

Evaluation

The evaluation of the subject will be carried out through three blocks based on the following criteria

Block (A) General Part I (Erosion Mapping) 40% of the course grade

Block (B) Specific Part II (according to group) 40% of the course grade

Block (C) Oral presentation 20% of the course grade

To pass the course (numerical grade greater than or equal to 5.0) each and every one of the following requirements must be compulsorily met:

Block (A) ≥ 4 (A) + (B) ≥ 10

Block (B) ≥ 4 $0.4 \cdot (A) + 0.4 \cdot (B) + 0.2 \cdot (C) \geq 5$

Works Blocks A and B

They will be prepared by all the members of the group and will be presented in PDF format. They must follow the structure proposed by the teaching staff in each of the parts.

The criteria that will be taken into account for the evaluation of the works of Blocks A and B will be the following:

Class attendance

Result of the personal interview carried out during the preparation of the works and tutorials

Cover, edition, index, pagination, writing and style, spelling, units, figures and maps, as well as monitoring of the proposed structure

Correction of calculations and operations

Understanding of concepts

Understanding and interpreting the results

Regarding the work of Block A (Erosion Mapping), a part of the mark will correspond to the continuous evaluation of the progress of the work, which will mean 25% of the mark of block A. This continuous evaluation will be individual. It will consist of the presentation of individual maps on the sub-basin sub-basin under study and calculations on the risk of erosion and real erosion. This part will also include a mandatory tutorial, in which each group (with all its members) will show the progress of the preparation of the report on erosion mapping. The other part, 75%, will consist of the evaluation of the report on erosion cartography that will be joint for the members of the group. This work will be evaluated based on the criteria that will be exposed in the work preparation guide. In the event of obtaining a grade for the work of less than 4.0, it can be recovered according to the indications and/or observations made by the teaching staff to improve it.

The recovery of Blocks A and B will be carried out 15 days after the publication of the qualifications of each one of them, by means of the delivery of corrected works.

The qualification obtained in the recovery of the works will reach at most the necessary note to be able to pass the subject. Therefore, it is recommended to do a good job from the beginning.

Delivery date Block A Work: Beginning of April

Delivery date Block B Work: Beginning of June

Oral presentation

The members of the group must prepare a presentation file using a presentation program (Powerpoint, Impress or equivalent), with a free structure that adequately reports on the methodology and results of the work carried out in both parts.

The presentation will be presented orally, by each member of the group for a maximum time of 25 minutes together. The order of presentation of the different parts by each one of the members of the group will be determined by the evaluation panel.

After the presentation, the members of the panel will be able to ask questions for a maximum time of 30 minutes.

The panel will be made up of the course coordinator, a teacher who has participated in Part I and 1 or 2 teachers who have participated in Part II. Right at the end of the oral presentation of each group, and after the pertinent deliberation of the court, said activity will be qualified.

The criteria that will be taken into account for the evaluation of the presentations will be:

Structure of the presentation (originality, morphology, composition, spelling, writing of the units and other formal aspects)

Oral expression

Attitude during the presentation

Attitude and correctness in answering questions or comments

If bloks A and B are not carried on time, the recovery is not possible, so the note will be "0" and the subject is not passed.

Dates of the presentation: according to the exam calendar of the center

This subject does not have the possibility of alternative evaluation due to its practical typology
