## Learning objectives

The training objectives of the subject of Internship are:

- Bring students closer to the workplace.
- Relate academic knowledge (know) with professional practices (know-how).
- Inculcate the students with the right attitudes to be in the workplace.
- Approach the universities in the world of the company.

## Competences

Basic

B01 That students have demonstrated to possess and understand knowledge in an area of study that starts from the base of general secondary education, and is usually found at a level that, although supported by advanced textbooks, also includes some aspects that imply knowledge coming from the vanguard of his/her field of study.

B04 That students can transmit information, ideas, problems and solutions to a specialized and non-specialized public.

B05 That students have developed those learning skills necessary to undertake further studies with a high degree of autonomy.

Transversal

CT4. To apply basic knowledge of entrepreneurship and professional environments.

General competences

CG6. To implement specifications, regulations and mandatory rules.

CG9. To organize and plan in the field of the company, and other institutions and organizations.

CG10. To work in a multilingual and multidisciplinary environment.

CG11. To understand and apply the necessary legislation in the exercise of the profession of Industrial Organization Engineer

Specific competences

CE6. To acquire the concept of company, institutional and legal framework of the company. Business organisation and management.

CE18. To acquire capacity for planning and developing new projects, products and processes.

## Methodology

There are three groups in which you can do the practices:

- Group 1: from October to January (4 hours per day)
- Group 2: from February to June (4 hours a day)
- Group 3 (of extraordinary nature): from July to August (8 hours per day)

## Development plan

The subject of Internship has a teaching load of 15 credits, therefore, considering that each ECTS credit equals 25 hours of work by the student, it results in a total of 375 hours, distributed as follows:

- 4 hours a day for four months (Group 1 or Group 2) in order to combine the performance of the practices with the attendance in class.
- 8 hours per day for two months (Group 3).

This is equivalent to a total of 320 hours of stay in the company and the rest of the time is devoted to the writing of the memory, academic tutorials and presentation of the memory.

## Evaluation

The evaluation of the course will consist of:

1. Self-evaluation of the student (10%): evaluation questionnaire made by the student, where he will score on various aspects related to the realization of his practices and the relationships with the various related actors.
2. Evaluation of the company (30%): questionnaire of evaluation carried out by the company, where the tutor in the company will score the accomplishment of the practices on the part of the student.
3. Memory evaluation (40%): The memory of the practices carried out by the student and the weekly tracking sheets visas by the company's tutor are evaluated by the academic tutor.
4. Evaluation of the presentation in front of the court (20%): presentation of the practices in public session by the student in front of a tribunal composed of the coordinator university-company of the center, the academic tutor and another tutor of practices in business.
