

# DEGREE CURRICULUM BUILDINGS AND EARTHWORKS

Coordination: PUIGDOMENECH FRANQUESA, LUIS

Academic year 2022-23

## Subject's general information

Subject name	BUILDINGS AND EARTHWORKS							
Code	102579							
Semester	1st Q(SEMESTER) CONTINUED EVALUATION							
Typology	Degree		Course	Character		Modality		
	Bachelor's De Agricultural a Engineering	egree in nd Food	4	COMPULSORY		Attendance- based		
Course number of credits (ECTS)	6							
Type of activity, credits, and groups	Activity type	PRACAMP	PRALAB		PRAULA	TEORIA		
	Number of credits	0.2	1.2		1.5	3.1		
	Number of groups	1	1		1	1		
Coordination	PUIGDOMENECH FRANQUESA, LUIS							
Department	AGRICULTURAL AND FOREST ENGINEERING							
Teaching load distribution between lectures and independent student work	Lectures: 60h Student work: 90h							
Important information on data processing	Consult this link for more information.							
Language	Catalan / Spanish	ı						

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention

PUIGDOMENECH FRANQUESA, LUIS	lluis.puigdomenech@udl.cat	3	

#### Learning objectives

The student upon passing the subject must be able to:

- 1. Know the behavior of the soil as a building material
- 2. Know the main soil tests and interpret a geotechnical report
- 3. Design the main elements of the project of a rural road (plan, elevation, type section, esplanade, drainage and firm)
- 4. Design the main elements of the project of an irrigation raft (stability of the dike, waterproofing, landfill)
- 5. Design the structure of an industrial shed and its foundation

#### Competences

#### General competences

CG1. Capacity for the previous preparation, conception, drafting and signing of projects whose purpose is the construction, reform, repair, conservation, demolition, manufacture, installation, assembly or exploitation of movable or immovable property that by its nature and characteristics are included in the own technique of agricultural and livestock production (facilities or buildings, farms, infrastructure and rural roads), the agri-food industry (extractive, fermentative, dairy, canning, horticultural, meat, fisheries, salting and in general, any other dedicated to the elaboration and / or transformation, conservation, manipulation and distribution of food products) and gardening and landscaping (urban and / or rural green spaces - parks, gardens, nurseries, urban trees, etc. -, public or private sports facilities and environments subject to landscape recovery).

CG2. Ability to direct the execution of the works subject to projects related to agri-food industries, farms and green spaces and their buildings, infrastructure and facilities, the prevention of risks associated with this execution and the management of multidisciplinary teams and human resources management, in accordance with deontological criteria.

#### Specific competences

CEMCR1. Bases and technology of rural constructions. Soil mechanics. Materials. Material resistance. Structure Design and calculation. Agricultural constructions. Infrastructure and rural roads.

#### Subject contents

Block 1

Unit 1: Soil mechanics. Characteristics of the soil as a building material.

Unit 2: Paths. Plotting, slope stability, surface drainage.

Unit 3: Irrigation rafts. Dock materials, stability, waterproofing sheets.

#### Block 2

Unit 4: The industrial warehouse- Vocabulary, structural typology

Unit 5: Enclosures. Enclosure materials and structure fixings

Unit 6: Straps. Design, sizing and testing criteria

Unit 7: Main structure: portico, truss. Design criteria and joints

Unit 8: Secondary structures and local reinforcements. Braces, braces, stiffeners, bases

Unit 9: Pavements. Design criteria.

Unit 10: Foundations. Geotechnics and design of isolated footings

#### Methodology

Practices

- Exercises and examples in the classroom and at home
- Practical case of a rural road

#### Development plan

Units 1 to 3: professor Álvaro Fernández, 3 credits

Units 4 to 10: professor Lluís Puigdomènech, 3 credits

#### Evaluation

Contents Evaluation		Weight %	
Part 1: Unite 1 to 2	Computer work	15	50
	Examination test	35	
Port 2: Unite 4 o 10	Test (Campus Virtual)	15 50	
	Exam	35	50
	TOTAL	100	

Pass criteria (these 3 requirements are mandatory):

- 1.  $0.5 \cdot (Part1) + 0.5 \cdot (Part2) \ge 5.0$
- 2. Part1 ≥ 4.0
- 3. Part2 ≥ 4.0

Students that fail any of these 3 requirements will do the makeup exam. Those students will have to improve the marks Part 1 or Part 2 below 4.0.

Students that reach requirements 2 and 3 but fail requirement 1 will be allowed to choose the mark (Part1 or Part2) to improve in the makeup exam

There aren't makeup exams for Computer work and Test (Campus virtual)

The final mark for any student after the makeup exam will not be greater than the final mark for any student who passed the subject without makeup
