Subject's extra information

Territorial planning aims to guide the location of the population, economic activities and physical infrastructures, while respecting the criteria of economic growth, social development and conservation of the environment. To do this is based on the knowledge, potentialities and specific constraints of each area. In this subject, this discipline will be addressed from the point of view of managing the effects that the tourism phenomenon can generate over space.

This teaching guide is intended to be developed with a group of 20 to 25 enrolled. If the number increases or decreases significantly, some of the activities and evaluation criteria may undergo modifications that will be discussed when the registration is closed and the final number of students is available.

This guide has been translated with google translate. In case of errors the version that prevails is Catalan.
