## Subject's extra information

This subject aims to enable the student to take part in research activity in the University. The student, during a semester, will be able to participate actively in one of the research lines of a group from the University.

## Competences

CB1. Have and understand knowledge that provides a basis or opportunities to be original in the development and/or application of ideas, often in a research context.

CB2. Knowledge on how to apply the knowledge acquired and have the ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.

CB4. Ability on how to communicate your conclusions - and the knowledge and ultimate reasons that support them - to specialized and non-specialized audiences in a clear and unambiguous way.

UdL1. Correction in written oral expression

UdL2. Command of a foreign language.

UdL3. ICT knowledge and abilities.

EPS1. Ability to plan and organize personal work.

EPS3. Ability to convey information, ideas, problems and solutions to both specialized and non-specialized audiences

EPS4. Ability to conceive, design and implement projects and / or provide innovative solutions, using engineering tools.

## Methodology

The student has to contact a professor from the research group which will receive them.

They will reach an agreement about the objectives to fulfill, the tasks to carry out and the work schedule.

## Evaluation

At the end of the semester, the responsible professor will write a report detailing the degree of fulfillment of the objectives alongside with the grade gained by the student.
