Subject's extra information

It is a general subject of a wide range of contents and applications within the forestry world. On the other hand, there is the possibility of welcoming students from many different countries and environments, with differences in the characteristics and problems of the forestry sector. For these reasons, in spite of the fact that there is a general outline of topics and content, the proposal of adaptation and / or modification of topics and contents by the students enrolled will be accepted.

At the beginning of the course and the subject, each student must submit your proposal or application for thematic completion and the corresponding work or subject work.
