Learning objectives

- To know the main international environmental standards and regulations in the European Community.
- To describe the principal characteristics of some forestry activities and industries that are usually subject to environmental impact assessment.
- To identify the environmental impacts of forestry activities and propose remedial measures.

Subject contents

1. Introduction to the international environmental standards and regulations in the European Community.
2. Forestry activities: reforestation, logging, river rehabilitation, forest roads. Principal characteristics, environmental impacts and remedial measures.
3. Forestry industries: sawmills, cork oak, pulp and paper. Principal characteristics, environmental impacts and remedial measures.

Evaluation

Course requirements include the presentation of individual and team work in class (70%), and a final exam (30%).
