Subject contents

In accordance with the "[Normativa de les pràctiques acadèmiques externes de la UdL](#)"

Article 2. External academic internships

"The external academic internships are a regulated and official teaching activity whose fundamental function is to contribute to the comprehensive training of students. Through the development of an academic work program in a company or institution, the student applies the knowledge and skills acquired during the course of the degree, in a professional environment close to the training objectives of the respective master's degree.

Methodology

External academic internships can be carried out in any company, institution or public or private entity, national or international, as long as there is a collaboration agreement with the UdL.

The academic tutor of the UdL will be in charge of:

Prepare the training project together with the tutor of the collaborating entity, and with the approval of the professor responsible for the internship subject.

Guide the student and follow up during the internship.

Guide the student in the writing of the report and approve it.

Evaluate the internship and propose a grade.

The tutor of the collaborating entity will have to:

Define the training project together with the academic tutor of the UdL, and with the approval of the professor responsible for the internship subject.

Welcome, assist and guide the student during the development of the tasks established in the training project and ensure that he/she receives adequate treatment.

Supervise the development of the work plan.

To be in contact with the academic tutor of the UdL and with the professor responsible for the internship subject.

Issue a final evaluation report of the student's academic internship according to the UdL model, via the web portal (or the one specified by the UdL, the ETSEA or the degree program).

In any case, the tutor of the entity must be a person who is linked, with professional experience and with the necessary knowledge for an effective tutoring.

The appointment cannot fall on the person who performs the functions of academic tutor.

Marc normative:

External academic internships are strictly academic. The educational cooperation agreement agreed between the UdL and the entity must explicitly mention the non-employment nature of the relationship, as well as the fact that the coverage of any accident is guaranteed by the compulsory school insurance or the complementary private insurance that the University has.

Development plan

Requirements for External Internships:

- To be enrolled in the external internship.
- When registering, select in which term you want the internship to appear on the record (i.e. the internship must be finished and evaluated).

Prior to the internship:

- Contact the professor responsible for the External Internship subject of the master's degree who will be in charge of assigning a company or institution.
- Once the company has been proposed, it will be necessary to sign a framework agreement of educational collaboration between the company or institution and the UdL (if not already established).
- A tutor from the company and an academic tutor from the ETSEA will be proposed.
- It will be necessary to agree on a work plan (Training Project) to be carried out during the internship that will have to be approved by both tutors. If necessary, a confidentiality agreement will be signed.

During the internship:

- The student cannot start the internship without the existence of the educational collaboration agreement and without all parties having signed the training project document.
- The stay in the company will be in accordance with the dates and conditions established in the Training Project.
- During the internship, the company tutor will supervise the student and the student may contact the academic tutor to solve possible doubts.

Una vez finalizadas las prácticas:

- El estudiante tendrá que redactar una memoria de un máximo de 10 páginas siguiendo las indicaciones que se le harán llegar.
