

Universitat de Lleida

DEGREE CURRICULUM
**PROJECT DRAFTING AND
MANAGEMENT**

Coordination: RUBINAT ARNALDO, ESTHER

Academic year 2022-23

Subject's general information

Subject name	PROJECT DRAFTING AND MANAGEMENT			
Code	14063			
Semester	2nd Q(SEMESTER) CONTINUED EVALUATION			
Typology	Degree	Course	Character	Modality
	Master's Degree in Health Research	1	COMPULSORY	Blended learning
Course number of credits (ECTS)	6			
Type of activity, credits, and groups	Activity type	TEORIA		
	Number of credits	3		
	Number of groups	1		
Coordination	RUBINAT ARNALDO, ESTHER			
Department	NURSING AND PHYSIOTHERAPY			
Important information on data processing	Consult this link for more information.			

Teaching staff	E-mail addresses	Credits taught by teacher	Office and hour of attention
RUBINAT ARNALDO, ESTHER	esther.rubinat@udl.cat	1	
SANCHEZ DE LA TORRE, MANUEL	manuel.sanchez@udl.cat	2	

Subject's extra information

The sessions can be recorded, for this reason *the University of Lleida (UdL) informs that, for teaching purposes, will record images that identify students and other people who participate in academic activities. The responsible person for processing these images is the UdL (contact details of the representative: Secretaria General. Plaça de Víctor Siurana, 1, 25003 Lleida, sg@udl.cat; contact details of the data protection officer: dpd@udl.cat). These images are only used for teaching, assessing subject's knowledge and for teaching improvement projects. The use of the images responds to the legal obligation of the UdL to teach and improve university teaching, in accordance with Organic Law 6/2001, of 21 December, on universities. The images, once recorded, are kept at least as long as they do not prescribe the corresponding actions and claims against the evaluation approved by the teacher. They are destroyed in the terms and conditions provided for in the regulations on the conservation and disposal of the administrative documents of the UdL, and the document evaluation tables approved by the Generalitat de Catalunya (<http://www.udl.cat/ca/serveis/arxiu/>). The UdL will never communicate this data to third parties, except in the cases strictly provided for in the Law. Interested people can access to their images; request rectification, deletion or portability; oppose the treatment and request its limitation, by writing to the address dpd@udl.cat </src/compose.php?send_to=dpd@udl.cat>. They can also submit a complaint addressed to the Catalan Data Protection Authority, through the electronic headquarters of the Authority (<https://seu.apd.cat>) or by non-electronic media*

Learning objectives

Know how to evaluate and select the appropriate scientific theory and the precise methodology of their fields of study to formulate judgments based on incomplete or limited information, including, when necessary and pertinent, a reflection on social or ethical responsibility linked to the proposed solution in each case.

Competences

Basic skills

CB3 Be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.

General Competences

CG1. The person with the master's degree in health research must be able to describe the scientific method and know how to apply it in the development of research in health sciences.

Specific Competencies

CE2: The person with the master's degree in health research must be able to internalize and apply the ethical principles in clinical research, make decisions based on those principles in conflict situations, as well as know

their limitations.

Subject contents

- **Module 1:** Introduction to research. Scientific method. Purposes and orientation of the investigation. Identification and definition of the problem.

Concept and function of the theoretical framework: theory, reference framework and conceptual framework. Relevance and feasibility of the project

- **Module 2:** Study protocol. The purpose of the study. Samples and variables.
- **Module 3:** Ethical, legal and institutional aspects of a project.
- **Module 4:** Organization and support and development structures. Organization of the start-up of the project. Curricular training of the team investigator. Selection and preparation of interviewers.
- **Module 5:** Financing agencies and calls.

Methodology

Theoretical classes

Resolution of exercises and problems

Individual work

Team work

Seminars

Tutorials

Development plan

Module 1: opens on November 4 and closes on November 22 at 23:00 h.

Module 2: November 25 opens and closes on December 6 at 23:00 h.

Module 3: opens on December 9 and closes on December 20 at 23:00 h.

Module 4: opens on January 6 and closes on January 17 at 23:00 h.

Module 5: opens on January 20 and closes on January 31 at 23:00 h.

Each module contains an evaluation activity of it.

Individual face-to-face tutoring on mandatory 3, 4 or 5 February. It can be done by the Sakai video conferencing tool or face-to-face in the office 1.12. It is necessary to ask for an hour in advance.

Delivery of the final work on February 28.

Evaluation

Activity	% Evaluation
Assistance and participation to master classes, seminars and tutorials	35%
Individual activities of continuous evaluation	35%
Group work	30%
