GUÍA DOCENTE
**ESTRÉS OXIDATIVO Y
ANTIOXIDANTES**

Coordinación: ROS SALVADOR, JOAQUIN

Año académico 2023-24

Información general de la asignatura

Denominación	ESTRÉS OXIDATIVO Y ANTIOXIDANTES			
Código	14706			
Semestre de impartición	1R Q(SEMESTRE) EVALUACIÓN CONTINUADA			
Carácter	Grado/Máster	Curso	Carácter	Modalidad
	Máster Universitario en Investigación Biomédica	1	OPTATIVA	Presencial
Número de créditos de la asignatura (ECTS)	4			
Tipo de actividad, créditos y grupos	Tipo de actividad	PRALAB	PRAULA	TEORIA
	Número de créditos	0.6	0.4	3
	Número de grupos	1	1	1
Coordinación	ROS SALVADOR, JOAQUIN			
Departamento/s	MEDICINA EXPERIMENTAL			
Distribución carga docente entre la clase presencial y el trabajo autónomo del estudiante	<p>Teoría: Hores dedicades a l'activitat formativa: 30; Porcentatge de presencialitat: 100% Assistència a conferències científiques i pràctiques orals comunicatives: Hores dedicades a l'activitat formativa: 10; Porcentatge de presencialitat: 100% Treball autònom: Hores dedicades a l'activitat formativa: 60; Porcentatge de presencialitat: 0%</p>			
Información importante sobre tratamiento de datos	Consulte este enlace para obtener más información.			
Idioma/es de impartición	Català Castellà Anglès			
Distribución de créditos	<ol style="list-style-type: none"> 1. Oxidative Stress Biology (1,4 crèdits) 2. Oxidative Stress in Medicine (1,0 crèdits) 3. Antioxidants and Nutrition (0,6 crèdits) 4. Seminars and other activities (1,0 crèdits) 			

Profesor/a (es/as)	Dirección electrónica\profesor/a (es/as)	Créditos impartidos por el profesorado	Horario de tutoría/lugar
AYALA JOVE, MARIA VICTORIA	victoria.ayala@udl.cat	,4	
CABISCOL CATALA, ELISA	elisa.cabiscol@udl.cat	,6	
JOVE FONT, MARIONA	mariona.jove@udl.cat	,8	
PAMPLONA GRAS, REINALDO RAMON	reinald.pamplona@udl.cat	,4	
PORTERO OTIN, MANUEL	manuel.portero@udl.cat	,4	
ROS SALVADOR, JOAQUIN	joaquim.ros@udl.cat	1,2	
SERRANO CASASOLA, JOSE CARLOS ENRIQUE	josecarlos.serrano@udl.cat	,2	

Objetivos académicos de la asignatura

To define and identify free radicals

To recognize the chemistry and biological sources of free radicals and other reactive molecular species

To define the concept of cellular stress

To know, at molecular level, the cellular defense mechanisms in front of oxidative stress

To characterize the free radical-derived molecular damage

To know methods for the detection and quantification of both free radicals and biomarkers of molecular damage

To identify and characterize antioxidant systems, locations and mechanisms of action

To recognize free radical biological effects and adaptive cellular mechanisms

To identify and recognize xenobiotics mechanisms of action and their nutritional and medical implications

To recognize the role of free radicals in pathological processes

To identify natural sources of antioxidants and its role in human nutrition

To acquire skills to analyze and communicate the scientific information

Competencias

COMPETENCES

CB1 Possess knowledge and understanding that provide a basis or opportunity for originality in developing and / or applying ideas, often within a research context

CB2 Being able to apply the acquired knowledge and have the ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study

CB4 Being able to communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and non-specialist audiences in a clear and unambiguous

CG1 Knowing how to select and apply different analytical methods at the molecular, biochemical, cellular, genetic and phenotypic level for the diagnosis and study of the diseases.

CG4 Capacity for critical and creative thinking with their own work and that of other researchers

CE9 That the students can identify the effects of oxidative stress, the cellular mechanisms of stress response and being able to apply the methods of detection and quantification of free radicals and molecular biomarkers of injury

CT1 Having a correct oral and written expression

Contenidos fundamentales de la asignatura

1. Oxidative Stress Biology (14 hours)

An introduction to oxygen toxicity and reactive species (1h)

The chemistry of free radicals and related 'reactive species' (2h)

Oxidative-derived molecular damage (3h)

Measurement of free radicals and molecular damage (3h)

Endogenous antioxidant defences (3h)

Cellular responses to oxidative stress: adaptation and repair (2h)

Cellular redox signaling (2h)

2. Oxidative Stress in Medicine (10 hours)

Oxidative stress, aging and longevity (2h)

Oxidative stress in human diseases (8h)

3. Antioxidants and Nutrition (6 hours)

Diet-derived antioxidant defences (3h)

Antioxidants in human nutrition (3h)

4. Seminars and other activities (10h/alumne)

Seminars: 4 groups (n = 3 x group)

Laboratory respirometry: 2 groups

Discussion of scientific papers: An article presentation x group for each field (1.OSB; 2. OSM; 3. A&N).
Presentation duration: 20 min.

Conferences: According to the IRB 'Friday Seminars'

Ejes metodológicos de la asignatura

El proceso de enseñanza-aprendizaje se llevará a cabo mediante:

- 1 Clases magistrales
- 2 Conferencias científicas
- 3 Debate dirigido: análisis y discusión de trabajos científicos
- 4 Clases prácticas

Plan de desarrollo de la asignatura

El proceso de enseñanza-aprendizaje se llevará a cabo mediante:

- 1 Clases magistrales
- 2 Conferencias científicas
- 3 Debate dirigido: análisis y discusión de trabajos científicos
- 4 Clases prácticas

Sistema de evaluación

Two intermediate evaluation activities for theoretical contents (30%+30%), 1 evaluation activity for scientific seminars (presentation, analysis skills and discussion) (30%), and 1 evaluation laboratory activity (10%).
